EDUCATION

Master of Science in Computer Science
Georgia Institute of Technology
Anticipated May. 2027

Bachelors of Science in Computer Science
University of Texas at Arlington
Dec. 2022

EXPERIENCE

Fidelity Investments | Jan. 2023 - Present | Westlake, TX

Senior Frontend Developer | Oct. 2025 - Present

- **Maintain an enterprise-wide Angular monorepo** utilized across multiple products, ensuring strict code quality, architectural consistency, and seamless integration of new features.
- **Architect and deploy custom Nx generators** to automate boilerplate code creation, significantly streamlining UI development workflows and accelerating feature delivery.
- **Enforce engineering best practices** and governance by conducting rigorous Pull Request (PR) reviews for distributed Angular developers.
- **Engineered a custom GitHub Copilot skill** integrated with internal documentation, leveraging generative AI to provide real-time technical answers and reduce developer friction.
- **Host technical office hours** to troubleshoot complex frontend issues, unblock engineering teams, and provide direct mentorship on core UI architecture.

Full-stack Engineer | July. 2024 - Oct. 2025

- **Facilitated and supported production deployments**, ensuring smooth rollouts and resolving post-installation issues or optimizations.
- **Spearheaded the architectural design and implementation** of a scalable Angular application for participant verification, integrating industry best practices in front-end development, component-driven architecture, and performance optimization.
- **Fostered close collaboration with UX designers** across the entire development lifecycle to deliver a refined and streamlined participant verification experience. Collaborative engagement facilitated the preliminary incorporation of user feedback and design tenets.
- **Engineered the implementation of a dark theme to significantly enhance accessibility and mitigate eye strain.** Prioritizing inclusive design and user well-being, this dark theme ensures optimal contrast, legible typography, and visual comfort, especially for prolonged use or sensitive eyes.

Associate Software Engineer | Jan. 2023 - June. 2024

- Contributed to Agile Angular/Java application development for Fidelity's customer service.
- Implemented E2E and unit tests with Playwright and Jasmine Karma.

Amdocs, Inc. - AT&T | Software Engineering Intern | June 2022 - Aug. 2022 | Plano, TX

PROJECTS

API Gateway Utility - LEAP | Angular, Node.js, Docker, Jenkins, Express.js | Apr. 2023 - May. 2023

- Led team to develop secure Node.js API for user authentication and Angular UI.
- Streamlined external API testing, reducing time by ~50%.

BinBuddy | Angular, Ionic Framework, Firebase, MapBox, Microsoft DevOps | Jan. 2022 - Aug. 2022

- Created a cross-platform app using **Angular** and **Ionic framework**, enabling residents to track local garbage trucks
 - Integrated **Firebase** for seamless data management and improved user experience
-

SKILLS & CERTIFICATIONS

Languages and Frameworks: C, C++, Python, Java, HTML, CSS, Flask, Angular, Ionic, React, Junit, NodeJs, TypeScript, Jasmine Tests, Jenkins, Docker, Tkinter, LLVM, Jest, Playwright

Tools: Insomnia, Android studio, Drupal, linux, Matlab, MySQL Workbench, Figma, SQLite, SQLAlchemy, Azure, IntelliJ, Eclipse, AWS, SQL Developer, Monorepo, Nx Console

HackerRank: Python (Basics), SQL (Basic & Intermediate).

IBM: Cloud essentials, Working in a Digital World: Professional Skill, Enterprise Design Thinking Practitioner
