EDUCATION

Master of Science in **Computer Science**
Georgia Institute of Technology
Anticipated Dec. 2027

Bachelors of Science in **Computer Science**
University of Texas at Arlington
Dec. 2022

EXPERIENCE

Fidelity Investments | Jan. 2023 - Present | Westlake, TX

Senior Frontend Developer | Oct. 2025 - Present

- **Maintain an enterprise-wide Angular monorepo** used across multiple business units, governing code quality, architectural consistency, and integration of new features.
- **Led frontend development** on strategic initiatives, partnering with Product, Design, and engineering to deliver complex, accessible, and responsive customer-facing experiences.
- **Designed reusable platform capabilities**, including custom state management, feature flag integrations, request interceptors, and shared application infrastructure used by multiple applications.
- **Modernized application architecture** by driving adoption of Angular standalone components and building custom Nx generators that automate scaffolding and speed up feature delivery.
- **Built a custom GitHub Copilot skill** grounded in internal documentation that gives developers real-time technical answers.
- **Strengthened engineering** quality and CI/CD with custom lint rules, improved test standards, Jenkins failure notifications, branch monitoring, and PR scoring enhancements.
- **Mentor early-career engineer**s and host technical office hours. Frequently chosen to lead ambiguous initiatives and unblock teams across concurrent workstreams.

Full-stack Engineer | July. 2024 - Oct. 2025

- **Facilitated and supported production deployments**, ensuring smooth rollouts and resolving post-installation issues or optimizations.
- **Architected and built** a scalable Angular participant verification app using best practices in component-driven design and performance optimization.
- **Partnered with UX designers** throughout development to deliver a streamlined participant verification experience, integrating early user feedback and design principles.
- **Implemented a high-contrast dark theme** to improve accessibility, reduce eye strain, and support user well-being.

Associate Software Engineer | Jan. 2023 - June. 2024

- Contributed to Agile Angular/Java application development for Fidelity's customer service.
- Implemented E2E and unit tests with Playwright and Jasmine Karma.

Amdocs, Inc. - AT&T | **Software Engineering Intern |** June 2022 - Aug. 2022 | Plano, TX

PROJECTS

API Gateway Utility - LEAP | Angular, Node.js, Docker, Jenkins, Express.js | Apr. 2023 - May. 2023

- Led team to develop secure Node.js API for user authentication and Angular UI.
- Streamlined external API testing, reducing time by ~50%.

BinBuddy | Angular, Ionic Framework, Firebase, MapBox, Microsoft DevOps | Jan. 2022 - Aug. 2022

- Created a cross-platform app using **Angular** and **Ionic framework**, enabling residents to track local garbage trucks
- Integrated **Firebase** for seamless data management and improved user experience

SKILLS & CERTIFICATIONS

Languages and Frameworks: C, C++, Python, Java, HTML, CSS, Flask, Angular, Ionic, React, Junit, NodeJs, typeScript, Jasmine Tests, Jenkins, Docker, Tkinter, LLVM, Jest, Playwright
Tools: Insomnia, Android studio, Drupal, linux, Matlab, MySQL Workbench, Figma, SQLite, SqlAlchemy, Azure, IntelliJ, Eclipse, AWS, SQL Developer, Monorepo, Nx Console
HackerRank: Python (Basics), SQL (Basic & Intermediate).
IBM: Cloud essentials, Working in a Digital World: Professional Skill, Enterprise Design Thinking Practitioner
